

# **HR 3635: Safe and Secure Federal Websites Act of 2013**

**Introduced December 3, 2013 by Rep. Kerry Bentivolio**

- **Requires federal websites that collect personally identifiable information be reviewed by the Government Accountability Office and certified secure for use by the Chief Information Officer of the department.**
- **Requires complete end-to-end security test and a named security leader**
- **Requires reasonable steps to minimize domain name confusion to prevent phishing scams**
- **Requires background checks for employees with access to sensitive information**
- **Requires ongoing security reviews**
- **Requires websites failing these criteria be taken off-line**

**(Healthcare.gov fails all of these criteria.)**
